

## Trial Summary

### Study of the effect of FoliarBlend® on spring wheat yield shows an 8 bushel / acre increase over control.

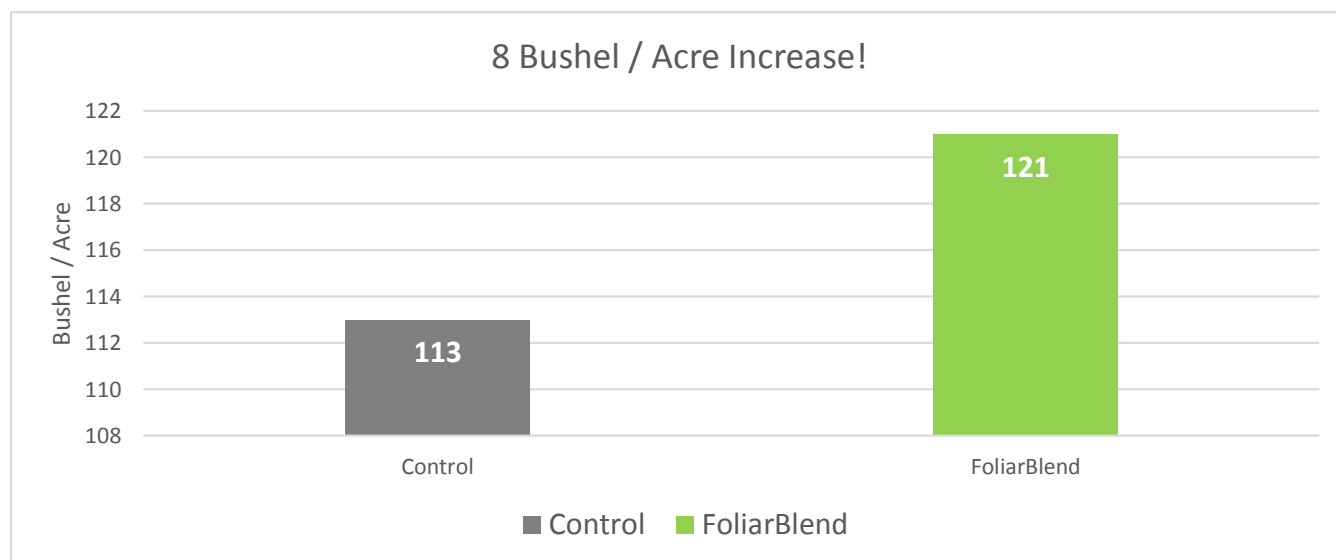

**Researchers:** BYU, Idaho – Rexburg, Idaho

**Notes:** Irrigated (Hand lines) Classic spring wheat. Year 1 of a 3 year wheat / potato rotation.

\*In the months of July, August and September all treatments experienced damaging quarter-sized hail, wind and rain at different times over the three month period. An estimated 20% of total grain was knocked to the ground due to hail damage.

### Applications

Crusier Max and 24 oz. FoliarBlend® per acre before jointing and at flag leaf.

Cost Analysis				
Treatment	Yield	Price/Bushel	AgriGro cost/acre	Revenue / acre Return / acre above Control
Control	113	\$6.00		\$678.00
Treatment	121	\$6.00	\$17.24	\$708.76
